PROFILE

MS in Business Analytics graduate with a Sports Business Analytics data certification and hands-on experience working with professional sports data, including NFL play-by-play analysis, and NBA game charting. Seeking an analytics role to use skills in SQL, Python, R, and data visualization to support a data driven organization.

PROFESSIONAL EXPERIENCE

For The Numbers (FTN) Remote | 10/24- Present

NBA/NFL Charter

- Collected detailed statistics such as screens, defensive contests and rebound contests data on a weekly basis for every possession, over an average of 350+ plays per game
- Developed expert-level NBA terminology to increase accuracy and supported NBA research team to create fantasy sports content and collaborate to engineer proprietary advanced metrics
- Collaborated with stakeholders to improve processes to optimize time spent on each game and receive feedback on methods for charting
- Thoroughly view NFL games and complete charts for skilled position players so that data can be used in company metrics and analysis

AMCON Distributing Company, Wisconsin School of Business Madison, WI | 01/24 – 05/24

Analytics Consultant

- Constructed a sales item dashboard using PowerBI for Sales Account Managers to relate to Retail Partners' and explore market opportunities to increase sales transactions and revenue
- Built a data pipeline by applying Python to clean excel files given from the sponsor and transform the files to a Pandas Dataframe where it can be administered to SQL
- Utilized MySQL workbench to create tables, load the data, and query metrics such as moving average, regional average, and individual product totals to upload into PowerBI dashboard
- Engaged with a team of six student teammates and project sponsor in weekly meetings to revise dashboard prototypes, celebrate accomplishments and plan for upcoming tasks

Manley Solutions Ladera Ranch, CA | 11/16 – 04/23

Project Manager

- Built and maintained invoice system with 100+ recurring customers in QuickBooks that automated monthly billing for Fire-Safety testing and produced subscription-based revenue
- Generated purchase orders with vendors on 50+ in-building projects to track budget costs and lower expenses
- Supported in-field technician with inbuilding-network project and system support to increase customer satisfaction and prevent delays

Saddleback College Mission Viejo, CA | 08/19 – 08/23

Mathematics Tutor

- Empowered ~25 students per semester to complete transfer prerequisites and improve their basic math fundamental skills including algebra, calculus, and trigonometry using Socratic Tutoring Method
- Created and presented workshop on Math anxiety and how to overcome it by changing attitude towards math and using Pomodoro Technique so that students can continue growth mindset
- Assisted students with math and statistics course homework and provided suggestions for future success improve moral, decrease frustration, increase satisfaction with class
- Developed practical skills with re-entry students practicing on tools such as Excel and Microsoft Office

Pacific Life Aliso Viejo, CA | 08/13 – 10/16

Case Coordinator

- Submitted more than ~10 new applications a day for Prime-Term products into internal network
- Maintained ongoing communication with licensed financial advisors on underwriter decisions
- Met and shared insights with team members to update and quality review current procedures

DATA PROJECTS – see GitHub portfolio

First Down Run or Pass Plays in the NFL (Tableau Dashboard): Used python to collect historical data from *nfl_data_py* API library and uploaded to Tableau to display percentages of pass or run plays on first down. The dashboard incorporates filters that include possession team, season, offensive formation, quarter, and distance from the opponent's goal line. This project can help further coaching analysis.
Creating Dataset for Baseball Hall of Fame exploration (SQL): Created an *AWS S3* bucket to extract and load data into *Snowflake* cloud database storage services from *Lahman* Baseball Database. Created *SQL* tables for MLB player career statistics, cleaned and transformed in Snowflake then integrated back into S3 bucket. Used for variable analysis for hall of fame players.

EDUCATION

University of Wisconsin-Madison, Wisconsin School of Business, Madison, WI
Master of Science in Business Analytics
Chapman University, Orange, CA
Bachelor of Science in Business Administration

TECHNICAL SKILLS

Software and Tools: Excel (VLOOKUP, Pivot Tables, What-If analysis), Google Colab, *Jupyter* Notebook, Rstudio, SAS Enterprise, QuickBooks, Snowflake, Tableau, PowerBI, Claude Code
Languages: SQL, Python, R
